# Lieut. Wilson speaks about the shooting of Sgt. Young

Sgt. Cornel Young Jr. was fa-tally shot on January 28 outside a local Providence diner by two

fellow police officers. The Anchor interviewed Lieutenant Charles Wilson of the Rhode Is-Lieutenant land College Police to see the viewpoint of the only black police officer in our community on this tragedy.

Originally from Ohio, Wilson served in various positions including Chief of Police for a municipality in northern Ohio. He has been a police officer for over 28 years and is a member of the Executive Board for the Rhode Island Minority Police Association (RIMPA).

Lieut. Wilson told The Anchor this was not the first time he been involved in a police funeral. In involved in a police funeral. In his twenty-nine years, he has attended many funerals and had come to accept this as just one of the hazards of the job. This death, however, hit closer to home as Wilson is a close friend of the Cornel family. As a pall bearer in the funeral, Lieut. Wilson said, for him, this was one of the most "...tragic and traumatic..." events for him as a police officer. In the past two weeks he has had time to reflect on the death of Sgt. Young. "This has replenished my need to be a good policeman and has made me reflect on what it takes to be a good black cop,"

Wilson commented.
When asked what he thought of the calls for an independent council Lieut. Wilson said that appointing an independent council "...does nothing more than aggravate already bad tensions."
The minority community already distrusts those that wear the uniform and, if this is not handled properly, the city will face major

ramifications.

Wilson also said he felt the team that has been assembled by the Attorney Generals office are very capable officers. An independent council is still needed so the members of the minority community will feel that everything is handled with integrity.

"This is not the first time a black cop has been shot...black police officers have been shot by fellow officers even while in full

fellow officers even while in full uniform in New Jersey..." Lieut. wilson said. It is an unfortunate reality but police officers do profile individuals. He believes that Sgt. Young was profiled and that led to his death.

Angry and hurt over the inci-

dent, Wilson still thinks about the two officers that shot Sgt. Young. Wilson expressed the hope that these men would get the help that they need. "They now belong to a very exclusive community and I hope that they receive the counseling they will need. If not, these cases usually end in suicide."

Lieut. Wilson is also hopeful that good will come out of this

that good will come out of this tragedy. The death of someone so young and promising must have something positive come out of

"How Can We Talk About Race?"

by Alli-Michele Conti Staff Writer

In recognition of African Amer-In recognition of African American History Month, a video and panel discussion, "How Can We Talk About Race?" will be held on Wednesday, February 23 from 12:30 p.m. to 2:30 p.m. in the Student Union Ballroom. The event is sponsored by the Counseling Center. A panel of faculty, staff and students will discuss why we trend to avoid talking about race. and students will discuss why we tend to avoid talking about race. In addition, the panel will also ad-dress ways in which we can begin to discuss racial problems and how we can turn discussion into possible solutions in hopes that this discussion "will launch talk in classrooms," stated Counseling Center Director Dr. Thomas

Lavin. The The panel consists of: Dr. Lavin; Dr. Mark Motte, Anthropology; Dr. Ellen Bigler, Educational Studies; Dr. David Espinosa, History; Dr. Lloyd Matsumoto, Biology; Ms. Sharon

Mazyck, Career Development; Mazyck, Career Development,
Mrs. Patricia Quigley, Nursing;
Ms. Julia Nezbit, Student Services, and student William

In addition to the discussion, a

video presentation will also be in-cluded. Although the title has not yet been chosen, one suggestion under consideration is Skin Deep, a documentary film in which stu-dents are placed together for a pe-

riod of time to sort out their feelings toward racism.

"We need to get people together not just once, but to stay together to discuss how we feel in order to work toward a solution," stated

Dr. Thomas Lavin.
Over a hundred students attended last year's discussion "Why Can't We Talk About Race?" and, as a result, Dr. David Harris, professor of Management and Technology, is offering a course this semester entitled "Managing Diversity." While the focus of last year's discussion was

to identify racial problems, this year focuses on the solutions to

those problems.

"Things that go on outside of the classroom," commented Lavin, "can be equally impor-

The results of a survey ques-tionnaire currently being distrib-uted to RIC students will be analyzed and compared to the results of a similar national questionnaire as part of the discussion. This is all in an attempt to give students the opportunity to share how they feel about racial issues.

While he does not expect the panel discussion to necessarily change minds, Dr. Lavin does hope it will break "the new taboo," that has everyone afraid to talk, out of fear of being labeled a racist. The process of getting past the fear by launching into discus-sion is the main goal of the panel. Select faculty members are ex-

Rhode Island is the only state where campus police are not permitted to carry firearms. Legislation is being submitted to the Rhode Island House and Senate in order to change this. Senator Michael Damiani and Representative Joseph Almeida have pledged their support of this bill; both have expressed concern for the safety of unarmed

ampus police.

Because only two campuses in Rhode Island maintain prosecution units many cases must be turned over to the local police for processing and investigation. As a result, a rape on campus will be reported as an "Assistance Rendered" case instead. Campuses do this in order to maintain a safe appearance for par-ents and prospective students. In re-ality this only leads to unsafe con-ditions and a false sense of security.

# Brown U. forum addresses meaning of race, blackness

The forum is the opening session of a five-part conference entitled "The Meaning of Race and Blackness in the Americas: Contemporary Perspectives," which runs through Saturday.

Opening to a standing-roomonly crowd, the conference was

organized by Brown professors Anani Dzidzienyo of Afro-Amer-ican Studies and Portuguese and Brazilian Studies; Michael S. Harper, University professor and a member of the English depart-ment; and Suzanne Oboler of Eth-nic Studies and the American Civ-

### The price of conscience

#### A social commentary

by Domenic A. Marabello Staff Writer

It is often asked, "Why do bad things happen to good people?" Why is it that the best of our society, the most conscientious, the most courageous, suffer the most? It is an axiom that those who possess a conscience, a sense of duty, also bear the burden and suffer the consequences of having them. So it was with Sgt. Cornel "Jai" Young, Jr., of the Providence Police Department who was fatally shot in a tragic misunderstanding in the early morning hours of Jan-uary 28. His death was made all the more tragic by the fact that he was "off-duty," trying to assist fel-low officers who did not recog-

To Sgt. Young, all that mattered was the right and wrong of it. He was a policeman, there was trou-ble, and he wished to help others. ble, and he wished to help others.

He died for it, when he could have played it safe. Playing it safe, though, is not for those who are courageous or dutiful. Playing it safe is a mantra for those who, for whatever reason, do not want to make a difference, those with make a difference - those with eyes that do not see, ears that do not hear, mouths that do not speak, and hearts that do not feel. Patrolman Young did not play it safe. He acted with the courage of his con-

victions and he died for it.

You may ask why? There is no answer. Old soldiers will tell you that the bravest and the best remain on the battlefield. It is the way of the world we have made. The world admires the survivor,

but it silently mocks those who confront the foe. Next to men like Sgt. Young, most of us would pale by comparison. This needless tragedy is a sign

of the times. In an age where po-licemen are trained to shoot to kill, could the outcome have been any different? He was a young man who had a pistol in his hand while a crime was in progress. Did the fact that he was a young black man have anything to do with it? Perhaps. Preconceived notions and racial stereotypes still poison the

air around us.

Should Carlos Saraiva and
Michael Solitro, III, the two onduty patrolmen who shot him, suffer for it? Chances are they're suf-fering already. They have to live with the memory of what they have done. Should Aldrin Diaz be charged with the murder of "Jai" Young? No, he should not. He didn't shoot the man, the two police-men did. It was a terrible accident. Scapegoats are too often sought these days, for too many things. If Rhode Island Law makes it legal to charge the man with murder, then it is an unjust law.

There is a lesson here. If such a

terrible thing can happen to so fine a young man, it can surely happen to us. The silencing of so brave a soul, so early in life, should make us stop and think. No, life is not

So, when we begin to feel sorry for ourselves, about being used, put upon, expected to sacrifice too much...think of Cornel Young, an "off-duty" policemen who could have played it safe.

# Disputing the Fines

by Seth Kahn Staff Contributor

As a student at Rhode Island College who works on campus, College who works on campus, it is impossible to find "convenient" parking anywhere. On average, 1 am on campus from 9:00 a.m. until at least 7:30 p.m. at night. My job duties include car-rying sensitive equipment, such as computers, in and out of build-ings. On Friday, February 4, there was absolutely no "convenient" parking near the building I was carrying computer equipment to, so I parked in a handicapped space next to the building. I know this was wrong on my part, but there were 5 open handicapped spaces closer to the building. I parked there anyway to drop off the equipment, risking the \$25.00 posted parking fine on the sign. Fifteen minutes later, I returned to my car and found a \$75.00

ticket. Why was it that I got a \$75.00 ticket when the sign said \$25.00? As campus police explain, "This is an issue on the campus that many people have complained about before, and it is Physical Plant's responsibility to fix these signs." Of course, Physical Plant says it is not their fault and offered no explanation or solution to this problem.

"It is explained in the student

handbook that parking in handirandook that parking in haldicapped zones without a proper permit would result in a \$75.00 ticket," says campus police. This is the way the system works at Rhode Island College; there are no answers for anything. Why is it that in Providence, which is the jurisdiction this college is located in, cars that park illegally get a \$15 ticket but here we get \$40 ticket? Is it because the campus can make some money to fix the parking problem that it has?

Will parking signs, such as handicapped and loading/towing zones, ever be updated to warn

students of the true price of a vi-olation? If they can't fix the signs, they should at least put stickers over the incorrect fine prices. I place the blame on the college for this matter and hope administration fixes this quickly. While it is wrong to park illegally, students, faculty, and visitors should at least know what the proper consequences are for their ac tions before taking the risk. I also urge everyone who has ever had a problem like this before to write to the school's admin-

istration to get this fixed as quickly as pos-sible.

our society in general, need to develop trans-portation poli-cies that don't encourage mindlessly wasting sources and adding to pollu tion, congestion, and the destabilization global climate.

# Cliff's Corner: American Values

by Cliff Rebelo

How many licks does it take to get to the center of a Tootsie Roll Pop? This question reminds me of the good old days in America when people lived more simply. Sitting on the porch and count-ing those licks on my Tootsie Roll Pops kept me busy for many an hour. Nowadays it seems that everyone is too busy to sit back and remember the true meaning of living in America. Up until the nineties, people had their big hairdos, women wore platforms and bell-bottoms, and everyone enjoyed the simple things in life...like roller-skating. Now, it seems that all we ever

talk about are scandals and gossip. When's the last time you even SAW someone licking a Tootsie Roll Pop? How has a nation like ours become so consumed with who is doing what,

who is doing who, etc. etc.? In the fifties, an idea of a great night was sitting with the family after a long day, eating some meat loaf and talking about how swell our day was. Now we get home, turn on MSNBC and find out who has "visited" the Oval Office, only to cause another American riot. Obviously, the people have a right to know, but why do some people make the news their whole lives? Let us not forget the stabbing personality of O.J. Simpson, which kept all of us glued to the television for months. Yeah, the O.J. trial was cool for the first week, but when I came home the second week and found my father almost mak-ing love to Marcia Clark on the TV set, I became emotionally upset. People just aren't taking any time to keep what's great in

America alive.

Maybe what I think is great is a little warped, but come on peo-

ple, wouldn't it be great if your biggest problem was trying to figure out who shot J.R.? Or how about this one; trying to figure out why anchormen have tornado proof hair without having to hear about something for the months straight? Now, I am

months straight? Now, I am an eighties child, but I am sure that in the eighties, we did not keep the same news story alive for ages the way we do now.

Everyone can go away from this article thinking what he or she wants, but as for me, I think that such great old nostalgic American institutions like the Tootsie Roll Pop (yes, I have a thing for Tootsie Roll Pops) kept everything in America simple. And everyone had the time to lick. Hopefully, one day, the people of this great country can igple of this great country can ig-nore Monica, Bill, O.J., and Bar-ney and grab a Tootsie Roll Pop and start licking until Dynasty goes into syndication.

# **Operation Snowflake**

by Amanda K. Vetelino Anchor Editor

Anyone student resident who's been living here for more than two years should be familiar with Op-eration Snowflake. For those who are not, allow me to explain. According to the Resident Student cording to the Resident Student Handbook, "If a decision is made by the Physical Plant to plow the [parking] lots, students in the res-idence hall will be notified..." If my memory serves me correctly, there was a snowstorm January 26, the second day of classes. Now, three weeks later, there is still snow and ice in the parking lots across from Sweet Hall and behind Weber Hall. Why? Over 300 students use those

parking lots on a daily basis. They should be as clear as possible so there are no accidents. A friend of mine told me that she slipped and fell on the ice on her way back to her room. I will give some credit; there was salt on the walkways, but that is not enough. In order for the salt to be effective, the temperature must be above freezing. Sure, the ice melts during the day, but the remaining water will refreeze and turn to ice again at night when the temperature drops The day following the storm, I went out to scrape all the snow

and ice off of my car. As I approached my vehicle, I noticed a mound of at least five inches of snow behind it. Needless to say, I was not thrilled to climb over it to get to my car. After cleaning it off, I returned to my dorm only to slip and slide three times while trying to get there. On the third time, I lost my balance, slipped on the ice, and fell. On returning to my room, I did a thorough bodily ex amination to find one of my hands and one of my knees to be skinned and bleeding. These injuries were minor, but could have been avoided if there was salt on the sidewalk

A handicapped person must have had more problems than I, so I really can't complain too much. The reason I mention the plight of handicapped people is

because my suitemate has Cere-bral Palsy and uses a walker to get around. There are snowbanks on most, if not all, of the sidewalks and she has difficulty getting over them. She also fell on a sidewalk and scraped her left hand.
In Section 5.04 of the Resident

Student Handbook, entitled Op-eration Snowflake, there is a detailed explanation on what to do in the event of a major snowstorm. As I recall, there was a major snowstorm last year at about this time and classes were cancelled. I also recall there being no announcement for residents to move nouncement for residents to move their vehicles so the parking lots could be plowed. My big ques-tions are "What is considered to be a major snowstorm? When will the Physical Plant decide to plow? Is it only after Mother Nature has dumped a foot or more of snow on us and roads are closed because the cars can't through?" This is not just a "once in a while" occurrence. This happens all the time and the problem needs to be rec-tified as soon as possible.

Dear Editor,

Did you read the opinion piece "More Parking Issues" in the Feb-

#### Letter To The Editor

ruary 1 Anchor? It had some thoughtful ideas, especially on en-couraging carpools. I would like to follow up and ask the Parking and Traffic Committee, and the campus community in general, to consider the following additional

Shuttle buses are expensive to operate from the outlying lots. It is best that people have the reasonable expectation that they may have to walk a bit from where they park. Almost all of us can benefit from some walking as long as walkways, where they exist, are cleared of snow and ice. New sidewalks may need to be constructed in some locations. Our maintenance people do their best but they need to be told to give pedestrians more priority after a storm.

We can eliminate all reserved

parking for everyone except the College President and, of course, the handicapped spots. This will use space more efficiently by not wasting spots when the bigshots with reserved spots are not on campus. It will also save the expense of multiple signs, issuing special parking stickers, patrolling

the lots etc.

We can park more cars in the same available space if some rows in some lots are striped for small cars only. This will help everyone park more easily.

We can promote transit to the campus. Did you know that each weekday there are 29 buses that come to campus, right to Roberts Hall? They run from 7:40 a.m. to 10:30 p.m. Schedules are printed in the Course Bulletin (page 53) but they also should be widely posted, printed in the Anchor, and visibly distributed at the Campus Center. Of course, not everyone can use this service but many can.

Indeed, our Board of Governors could modify their strange policy of charging for using the library, but not the parking lots! This regressive, unfair policy forces students to some a car to subdents too poor to own a car to subsidize the parking expenses (strip-ing, lighting, patrolling and main-taining the lots) of those that do. Upon entering Rhode Island College this past fall, Sajdah Ahmad wasn't sure if she would be competing in gymnastics at all for the Anchorwomen, Ahmad had previously been a level ten gymnast for USAG (USA Gym-nastics), but after two knee in-juries, Ahmad was unsure about joining the team. "I was upset for so long because of my knee in-jury and I wasn't sure if I could do it or even wanted to do it," says the New London, Connecticut,

Ahmad eventually decided to compete for the Anchorwomen and has been leading the team in several events, averaging scores of 8.875 on bars, 9.010 on floor and 34.745 in all-around compe-"I wasn't expecting to be leading the team in those events.

"Sajdah is one of the top gymnasts in Division III already," Zeiner-Daigle says. "We've lost a lot of key veterans over the past two years and Sajdah has come in and done a great ob. She is very talented and has job. She is very talented and has a chance to go to the National Championships this season (Springfield College will host the 2000 National Collegiate Gym-nastics Association Championships in mid-March). She is only going to get better with more experience."

The Anchorwomen are cur-

rently 2-4 overall, playing against some of the toughest

competition in the region, includ-ing Division I Brown University and Division II University of Bridgeport. "It motivates me when I see these top gymnasts from Division I and II schools. It just makes me try that much harder," she says.

# **Aquatic Programs** and Special Events Aquatic Exercise is increas-

ing in popularity worldwide. Why? It's fun to learn and readily adaptable to people with a wide range of fitness levels. You don't have to know how to swim and you don't have to get your hair wet. People are flocking to water aerobic classes in large numbers because anyone can learn to get the workout that is just right for their individual needs. It's so great it must cost a lot, right? Wrong! It's at the Recreation Center and it's FREE. Classes are scheduled at 9:00 a.m. on Monday, Wednesday, and Friday, 12:00 noon Monday through Friday, and 5:00 p.m., Monday through Thursday. The Tuesday 5:00 ticipants for this class should feel comfortable in water over their heads. You don't have to be a great swimmer.

Speaking of great swimmers, you could learn to be one. These are just two opportunities to help you on your way. Synch and Swim is a short course to teach participants to breathe properly (it makes swimming a lot easier) and how to increase endurance (that's the distance or time that you can swim continuously). It will meet 7:00 p.m. to 7:30 p.m. on Wednesday, February 16, 23, and March 1. If you already know that and would like some expert coaching advice on your strokes, sign up for the Video Taped Stroke Analysis clinic. It is scheduled for Wednesday, February 23, any time between 12:00 noon and 1:30 p.m.

### Florida Group Plans Affirmative Action March

by Steve Bousquet Knight Ridder Newspaper

TALLAHASSEE, Fla. - Hoping to capitalize on growing op-position to Gov. Jeb Bush's One Florida plan, a coalition of groups plans to march on the state capital next month to protest Bush's alternative to affirmative

The march is scheduled for 11 a.m. on March 7 — and the tim-

a.m. on March /— and the tim-ing is no accident.

The first Tuesday in March is the opening of the annual legisla-tive session that traditionally, be-longs to the governor, whose State of the State speech to a joint session of the Legislature sets the agenda for the two-month law-making session. While leaders of the "Coalition of Conscience" were careful not to make turnout predictions, a show of force would overshadow Bush and steal the media spotlight at a mo-

ment savored by governors.

Organizers noted that March 7
also is the 35th anniversary of a
historic civil rights march in

Selma, Ala. It's also "Super Tuesday," the day of presidential primaries in several large states, where Bush's brother, Texas Gov. George W. Bush, hopes to clinch the Republican presidential nomination. Florida's presidential primary is a week later.

"If you believe in equal opportunity, and if you really believe that a segment of this state is being left out of the One Florida plan, please join us on March 7," said Adora Obi Nweze of Miami, president of the state NAACP.
"We ask you to get on buses, vans and cars, and we look forward to and cars, and we look forward to making this the largest demon-

stration this state has ever seen."
The sheer size of Florida, and the fact that the capital is more than 400 miles from the major metropolitan area of Miami-Fort Lauderdale, pose obstacles for attracting large numbers of protest-ers from around the state. But organizers have a telephone hot line at 850-877-0307 and a Web site

at 850-877-0307 and a Web site (www.marchontallahassee.com). Protesters include the AFL-CIO, NAACP, Southern Christian Leadership Conference, Floridians Representing Equity and Equality, National Organization for Women, Florida Association of Business and Professional Women, and League of United Latin American Citizens. said Kwiese Organizers Mfume, a former congressman and national president of the NAACP, and Martin Luther King

III, son of the slain civil rights leader, planned to attend the protest; the Rev. Jesse Jackson also might attend. Organizers said an economic boycott of Florida businesses is not under

consideration.

Bush, who was in Bartow on state business Monday, has re-peatedly said opposition to his initiative would not deter him. Spokesman Justin Sayfie reiterated that the plan would increase diversity in university admis-sions and state contracting, not

"The governor is not satisfied with the status quo, and he believes the One Florida plan will increase opportunities for hundreds of African-American high school students to attend the state university system and create mil-lions of dollars in business for African-American businesses," Sayfie said. "He's committed to implementing the plan to increase diversity. ... If people are simply posturing for political reasons, we're going to move

on."
The protest is the latest outgrowth of last month's all-night sit-in by two black lawmakers, Sen. Kendrick Meek of Miami and Rep. Tony Hill of Jack-sonville. Hundreds went to the first One Florida hearing in Tampa, and more than 4,000 turned out in Miami last week. The third hearing is set for Thurs-day in Tallahassee, and protest organizers called on Bush and legislators to change the location from a 300-seat legislative hear-ing room to a much larger site. Yellow fliers circulating in Tal-

lahassee encourage college stu-dents at historically black Florida A&M University to show up at Thursday's hearing: "The movement is on ... the masses must be uplifted," the fliers say.

Although many protest leaders have close ties to the Democratic Party, the attitude of rebelliousness seems to have mushroomed far beyond what Meek and Hill envisioned when they decided to plop down on the lieutenant gov-

prop down on the neutenant governor's couch on Jan. 19.
Sayfie and Bush's deputy general counsel, Reginald Brown, attended the protesters' news conference in a sign of how seriously the administration appears to be treating the growing mood of opposition across the state.

"When the governor was elected, we did not elect a king. We elected a governor to repre-sent the people of Florida," said Matilda Martinez Garcia, past state director of the League of United Latin American Citizens.

### Sites, search engines crippled by computer hackers

by John Drake The Lariat Baylor University

(U-WIRE) — What a tangled Web they leave! Webmasters everywhere cringed last week as computer hackers, in a calculated effort, shut down such trusted sites as Yahoo!, Amazon.com, and

eBay.
The assault began Monday, February 7 when hackers bom-barded yahoo.com with so much information, the site was inaccessible for longer than two hours. At the attack's height, Yahoo! was receiving about a gigabyte of information per second-the amount most web pages will receive in an minust web pages will elected in a centire week. On February 8, victims included Buy.com, eBay, Amazon.com, and Time Warner Inc.'s news site. On Wednesday, February 9, ZDNet Inc. and E\*Trade found themselves vicinized by this latest blow to Inc.

timized by this latest blow to In-ternet security.

"It's kind of scary," said Bob Hartland, associate director for natuand, associate director for network services at Baylor Uni-versity. "Yahoo! is not a light-weight. They're a heavyweight and they've got all sorts of secu-rity." Hartland compared this week's attacks to a hundred ten-nis ball machines simultaneously. nis ball machines simultaneously shooting balls across the net to single player. "There's no way it can respond to all the informa-

This type of hacking is called a denial of service attack. This is different from a hacker infiltrating a system and changing the Web site or stealing information. "The way you deny access is by sending a lot of phantom requests and while it [the server] is trying to answer a bunch of phantom requests it doesn't have time for everyone else's requests," said Dr. Jeff Donahoo, assistant professor of computer science at Baylor.

He said the volume of requests necessary to result in the types of shut downs that occurred last week could be sent via a computer program. Hartland said such a program could begin with a single hacker and spread like a virus to thousands of innocent servers. The hacker could them activate all the "slave programs" at once and direct them toward a single Web site, resulting in the kind of shut downs that occurred this week.

For this reason, finding the ori-gin of this attack is like trying to find the origin of an e-mail chin letter. Hartland said Baylor's web server received a denial of service server received a denial of service attack last year. "All of a sudden our network congestion went way up which meant our response times went way up," he said. Baylor traced the attack to a computer in Norway and was able to block the address from sending information within thirty minutes of detion within thirty minutes of de-tecting the problem. The person responsible for the attack was never located.

Since seemingly any Web site is vulnerable to this sort of attack, finding a solution is on the minds of Web site security agencies. "I haven't really seen any good so-lutions to these sorts of attacks," Donahoo said. "There are solu-tions but they are guesses. You guess if this packet that sends a re-quests is a legitimate work needs to go into filtering attacks from legitimate requests.

"I don't imagine that hacking will completely be stopped," said Ning Zhou, a Richardson senior Ning Zhou, a Richardson senior and president of Chi Sigma Iota, a computer science professional organization. "I think it is going to be an on-going process with security people trying new ways to protect their systems and the hackers finding new ways to break in. I don't see that changing."

Zhou was not rising his eyebrows at this latest string of hack-ing. "I wasn't surprised," he said. "I was surprised it happened now; I thought it might happen during the Y2K turnover. I knew they had the ability."

In the meantime, the Federal Bureau of Investigation is launching a full-scale investigation into the hacking to find the person or people responsible for taking the exclamation point out of Yahoo!'s
